

# **Mr. hyre project report**

## **Project Title: MR. HYRE – AI Powered Recruitment Platform**

### **Abstract:**

MR. HYRE is an intelligent recruitment platform developed using Flask, Python, MySQL, and Google Gemini AI. The platform helps recruiters manage job postings, collect candidate applications, upload resumes, and perform AI-based resume analysis.

The objective of the project is to automate and simplify the recruitment process by reducing manual screening efforts and providing intelligent candidate recommendations.

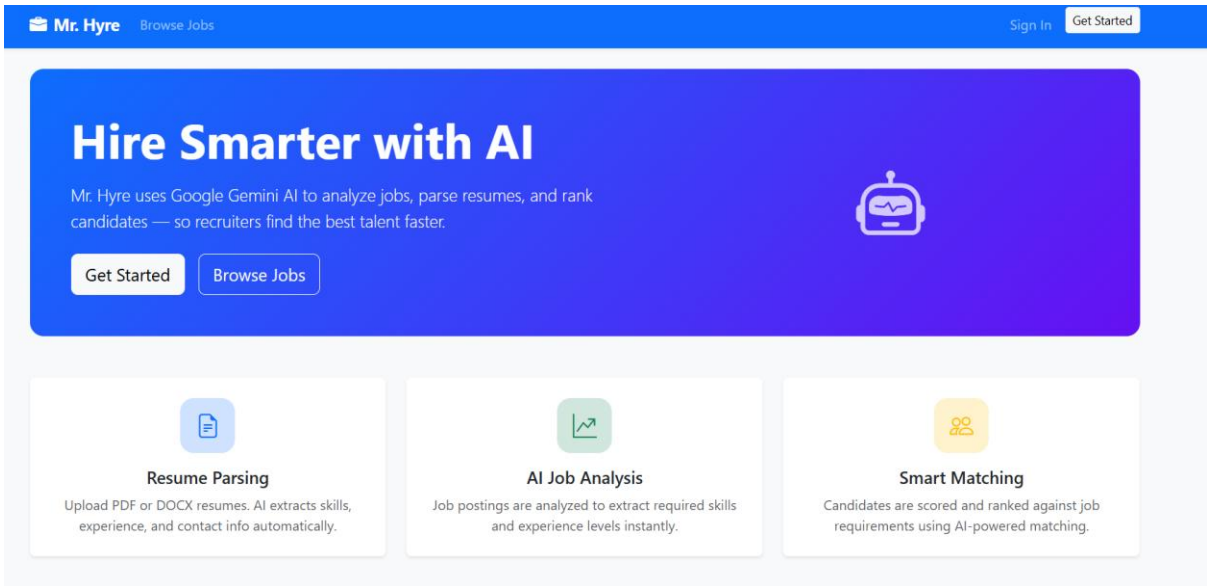

### **Objectives:**

- Automate candidate screening.
- Analyze resumes using AI.
- Improve hiring efficiency.
- Provide better candidate-job matching.
- Reduce recruitment time.
